Völcker, E.

A PIEZO-ELECTRIC MEASUREMENT DEVICE FOR THE DETERMINATION OF ACCELERATIONS OF SHORT DURATION. [1962] 9p. (figs. [refs.] omitted). Order from SLA \$1.10 63-10028

Trans. of Frequenz (Germany) 1949, v. 3 [no. 8] p. 244-249.

DESCRIPTORS: *Piezoelectric gages, *Meters, *Acceleration, Damping, Oscillation, Resonance.

An acceleration - and pressure-measuring device is described which operates according to the piezo-electric principle. An experimental investigation is carried out of the resonant frequency and degree of damping of the oscillating system. Proof is furnished that the apparatus may be adjusted to a degree of damping which is optimal for the recording of oscillation. (Author)
